## DETAILED ACTION

1. The indicated allowability of claims 1, 4, and 5 is withdrawn in view of the newly discovered reference(s) to Moberg ('591). Rejections based on the newly cited reference(s) follow.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 4, 5, and 7-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Moberg et al (US 6,362,591).

Moberg discloses a syringe pump having a drive mechanism 120, an occlusion detector including a force sensor 7' (see US 4,678,408 incorporated by reference in col. 4, lines 27-30), and the method steps as claimed. Moberg's syringe pump is operable in response to a detected occlusion to reverse the drive applied to move the plunger along the barrel sufficiently until the force detected by the force sensor falls by a predetermined amount.

***Response to Arguments***

4. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
